

Put Your HR Data to Work with HireTouch

Every HireTouch™ Talent Management Solution includes our powerful Report Writer tool, which allows you to view your HR data visually, create dynamic reports, facilitate exploration and analyze trends. Securely export and share reports to spread knowledge and stay compliant.

Stay Compliant with HireTouch

Through our work with higher education institutions, we understand the importance of compliance and how it is an ongoing challenge that each institution must face. HireTouch helps ease that challenge by simplifying the processes and reports needed to stay compliant with government hiring regulations. Features, such as triggers, allow you to automatically generate and export EEO compliance, veteran employment, disability reports and more on a scheduled basis.

Dimensional Data Analysis

Find patterns and relationships in data by using sophisticated techniques to build models, providing abstract representations of reality. Large amounts of data stored in a series of dimensions, or cubes, allow the user to easily select only relevant dimensions, thus expediting analysis significantly.

Relate to Your Data

Your data is important. With HireTouch, you have the power to extract specific data points to focus on areas of interest that matter to you. Quickly and easily modify charts and graphs by adding or removing parameters, filters and options such as displaying the data as a pie chart, bar graph or diagram.

Example Reports Created in Report Writer

More than 500 types of reports have been created in Report Writer. Here is a small sampling of what you could create:

- Applicants by Job
- EEO Detail
- Hired Applicants
- Jobs Created by Year
- Job Details Report
- Open Jobs
- Position Requisitions Report
- Positions By Category over Fiscal Year
- Time to Hire
